

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-19 (Canceled)

20. (Currently amended) A method of receiving compensation for a security system for protecting content distributed ~~on a~~ over a computer network comprising:
selling a server security program to a content provider; and
selling a plurality of copies of a limited-use client program to the content provider
for licensing to users wishing to access the content;
wherein the server security program distributes the content to a client system if the client system has a limited-use client program and wherein the limited-use client program limits reproduction of the content at the client system in at least one way.

21. (Original) The method of claim 20, wherein the compensation is received at least from one of (a) when the server security program is executed by the content provider and (b) when the content provider licenses one of the plurality of copies.

✓ 22. (Canceled)

23. (Original) The method of claim 20, wherein the compensation is based on advertising revenue obtained by the content provider based on advertising in connection with a user accessing content protected by the security system.

✓ 24-83 (Canceled)

84. (Currently amended) A method of receiving compensation for distributing protected content over a computer network comprising:

- (A) providing network accessible protected content from a source;
- (B) authorizing downloading of protected content from a source to a client system; and
- (C) preventing non-ephemeral reproduction of the downloaded content at the client system until compensation is received.

85. (Currently amended) In a computer program product for use with a computer system operatively connectable to a computer network and capable of distributing protected content over a computer network, the computer program product comprising a computer useable medium having embodied therein program code comprising:

- (A) program code for providing network accessible protected content from a source;
 - (B) program code for authorizing downloading of protected content from a source to a client system; and
 - (C) program code for preventing non-ephemeral reproduction of the downloaded content by the client system until compensation is received.
